

**K J Somaiya College of Engineering,
Mumbai-400077**

Department of Computer Engineering

List of Experiments

**Course: Web Programming Laboratory
(116U01L401)**

Year : 2023-2024 (Second Term)

Semester –IV

Course Outcome	After completion of this course students should be able to
CO1	Design dynamic web pages using various HTML tags.
CO2	Use CSS to prepare the layout of web pages.
CO3	Apply JavaScript for validation in client side programming.
CO4	Integrate server side pages using php.
CO5	Apply database operations by integrating SQL queries and session variables.

Sr. No	To pic	CO Mapping
0	Installation/Introduction: A) Any code Editor: VSCODE, ATOM, Sublime text editor, Notepad++ etc. Any online Editor. B) Xampp Server Installation. C) Git & Github: Version Control System.	
1	HTML: Design the static web pages with the help of HTML5. Example: A) Design the following static web pages required for an online book store web site. 1) HOME PAGE: The static home page must contain three frames. 2) LOGIN PAGE: 3) CATALOGUE PAGE: The catalog page should contain the details of all the books available on the website in a table. 4) REGISTRATION PAGE B) Create a table to show your class timetable.	CO1

2	Develop and demonstrate the usage of inline, internal and external style sheets using CSS.	CO2
3	Develop and demonstrate JavaScript with POP-UP boxes and functions for the following problems: a) Input: Click on Display Date button using onclick() function Output: Display date in the textbox b) Input: A number n obtained using prompt Output: Factorial of n number using alert c) Input: A number n obtained using prompt Output: A multiplication table of numbers from 1 to 10 of n using d) Write JavaScript to validate the following fields for the registration page. Name (Name should contain alphabets and the length should not be less than 6 characters). Password (Password should not be less than 6 characters length). E-mail id (should not contain any invalid and must follow the standard pattern name@domain.com) Phone number (Phone number should contain 10 digits only).	CO3
4	Demonstrate the use of Bootstrap: Create a “registration form “with the following fields a) Name (Text field) ((Name should contains alphabets and the length should not be less than 6 characters) b) Password (password field) ((Password should not be less than 6 characters length) c) E-mail id (text field) (should not contain any invalid and must follow the standard pattern name@domain.com) d) Phone number (Phone number should contain 10 digits only) e) Sex (radio button) f) Date of birth (3 select boxes) g) Languages known (checkboxes – English, Telugu, Hindi, Tamil) h) Address (text area)	CO2
5	Develop and Demonstrate the use of Form Handling and Validation in PHP: Example: Design the personal information form, submit and retrieve the form data using php \$_POST, \$_GET,\$_REQUEST variable.	CO4
6	Demonstrate the use of Cookies and Session in PHP. To Understand Difference between cookies & sessions. To Understand how to create & destroy session /Cookies variables.	CO4
7	Demonstrate the file Uploading in PHP	CO4
8	Design and Demonstrate database Connectivity between PHP & MYSQL a) Write a PHP code to create a database & table in Mysql.	CO5

	b) Write a PHP code to insert, delete, select and Update the data from the database. c) Create Dynamic, Interactive and database -Driven web application Individually using php & mysql.	
9	Deployment of Web application	

Mini Project:

Mini Project on Web Programming Lab. (25M)

- Mini project is between 2 students only.
- Selected topic specifies the details of implementation.
- Mini project includes the demonstration of the usage of:
:- HTML/HTML5, CSS/CSS3, Bootstrap 3/4, JavaScript, JavaScript validation, PHP, PHP forms, PHP Validation, PHP Session, Database Connectivity, Deployment of Project.
- Usage of Version control system. (Github).

Course Teachers:
